 Cube: 0.467 cubic feet
 Refrigerate after opening.

Pouch Pak™ Tuna

WHY DID WE INVENT POUCH PAK™ TUNA?

TUNA SOONER™ the only patented 100% yield **POUCH PAK™** tuna is designed for today's professional food service operator. We know that food safety, labor costs and operational efficiency are paramount to you. That's why Jana Brands invented the Pouch Pak category over twelve years ago.

WHAT ELSE MAKES US THE BEST?

No Fillers

Tuna Sooner is produced without Soy, Hydrolyzed Vegetable Protein and other fillers. Soy is a known allergen and is used to absorb excess water. For a fresher, natural tasting tuna use Tuna Sooner™ in all your tuna recipes.

Increased Savings

Save on labor through reduced preparation times. Save on storage in the dry good area from our reduced case size. Save on disposal cost from the reduction in waste volume. Stop wasting your time having to return dented tuna cans to your distributor.

Unmatched Safety

No more cans mean no more metal and the problems it can cause. Say goodbye to can related injuries while ensuring that your patrons don't get "a little something extra" in their next sandwich. Less prep time means less handling; decreasing the risk of food borne illness.

Superior Flavor and Appearance

Bid farewell to the saltiness and metallic aftertaste you grew up with. Experience the clean, natural taste of Tuna Sooner™. Our patented process and reduced retort cooking time ensures a consistency of color and texture unheard of in the canning industry. Your recipes will be more delicious and visually appealing pouch after pouch, case after case, year after year.

And Speaking of Nutrition

Tuna Sooner™ is naturally low in fat and cholesterol, making it perfect for healthcare and hospital kitchens everywhere.

Still not Convinced?

Join the growing list of customers from every facet of the industry as they completely change the way tuna is used. What do the biggest sandwich chains in the world as well as the smallest owner operators have in common? They all recognize value, safety and quality.
